

Software add-on for logger functionality

You like to log your data during the different vehicle test drives?

With this software add-on the following functions are added and data can be logged:

Key features:

- Configuration of the functions via PC
- Trigger points during the configuration selectable (Pre-; Post-trigger; event combinations)
- Logging of CAN messages and CAN signals
- Log-save on Compact-Flash-Card up to 1 GB with the MKT-View+
- Log-save on SD-Card up to 2 GB with the MKT-View II and MKT-View III
- Logging of:
 - 140 signals up to 48 messages at the same time
 - 1500 messages per second (bus load: 10.000)

The logged and saved data can be transformed into different standard formats such as:

- CANoe-ASCII
- DIAdem
- CSV
- ASCII

... and others

Order no.: 15001
